Largest Blade Shipped in North America

The largest blade shipped to date in North America was at the Fort Worth yard on June 18 on a stop-over on its way to Windsor, Colorado. The 55 meter Vestas blade (almost 180 1/2 feet) is one of three prototypes. This blade was moved by **Hubert Morgan (900303)**, who has worked for Lone Star since September 2005.

Vestas Employees Come to Fort Worth

Several Vestas employees followed the loaded blade from Port Arthur, Texas, to the Fort Worth location to see how the huge blade would ride on its way to Canada.

Pictured left to right are Vestas employees Carsten Svennevig, Paul Iversen, Duncan Galbraith and Claus Justesen.

Schnabel Trailer with Wind Tower Section Displayed at Convention

A Schnabel trailer loaded with a Vestas Base Section of a Wind Tower was stationed at the Fort Worth yard in preparation for display at the American Wind Energy Association Convention at the Dallas Convention Center in May. Jerry Vaughn—Heavy Haul Planning Manager, top right, along with Steve Cox and James Hester—both of Central Dispatch (above), helped get this ready for show. Aubrey Scully—Vice President of Logistics/Brokerage and Marti Terry—Brokerage, viewed the huge load while it was on the Fort Worth yard.

Hey everybody, Huey's home

Built in Fort Worth in 1970, Baby Huey has made his last flight and come to rest at the Sam Rayburn Memorial Veterans Medical Center in Bonham. Donated by the Department of the Army and transported at no charge from Temple to Bonham, Texas by Lone Star, Baby Huey will be lovingly restored to the colors and designation of the 101st Airborne.

This ship served our nation in Vietnam with the 101st and the 377th artillery. Bell Textron Helicopter played a vital support role in the acquisition and will be lending support to the restoration project.

Welcome home, Baby Huey!

Brian Johanson (908281) moved the helicopter from Temple, Texas to the Sam Rayburn Veterans Center in Bonham, Texas.

Erik Sanders, Assistant Chief, EMS/Planetree Champion, Sam Rayburn Memorial Veterans Medical Center of Bonham, Texas sent this message: *"I just wanted to thank you folks for your support in this project. It means a lot to us and will mean a lot to our veterans once on display."*

Vince Vargas
Field Safety Supervisor

Welcome to Lone Star

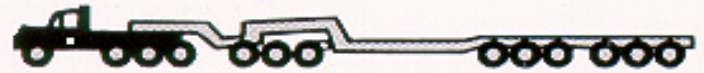

Please welcome Vince Vargas to the Lone Star Safety Team. Vince and his family reside in Houston, Texas, and he works out of the Houston office.

Vince brings 15 years experience in motor carrier fleet safety with him and will be an asset to the team.

Harold Martin (900151) hauled this load in July for Atlas Copco from Garland, Texas to Eagle Pass, Texas. Harold has worked for Lone Star since May 2010.

Lone Star Loads. . .

This steam skid was moved from Locust Grove, OK to Nisku, AB, Canada by **Howard Broussard (900247)**. Dimensions were 181'6" L x 12' W x 16'6" H.

This liquid nitrogen tank moved from Houston, Texas to Indianapolis, Indiana by **Kervin Clark (900120)**. Dimensions were 144'L x 13' W x 15'8" H.

This load picked up in East Peoria, IL and delivered to a dealer in Eagle Pass, Texas. When **Ken Hanson (140042)** arrived, the customer had a crane on site waiting to off load. Ken looked at the crane, had the customer send it away, then proceeded to throw down 4 hardwood blocks and off loaded the machine without a crane. The customer was so pleased, he had Lone Star haul five more machines in this configuration using a beam trailer, which saved the customer about \$30,000 in cranes.

This tower section was moved in the Colorado State Fair Parade in Pueblo, Colorado for Vestas, by **Howard Broussard (900247)**.
